

# ***Summer Internship***

**including 3-week workshop  
with 20 tribal college students  
at Haskell University, travel paid**

**Work with Mentor @ SKC  
On your own Remote Sensing & GIS  
project**

**Open to all students, especially:  
Forestry, Hydrology, Wildlife,  
Tribal Historic Preservation, etc.**

*Work with SKC instructor  
Robert Kenning on your own project,  
using satellite & aerial imagery and GIS mapping to  
study Climate Change,  
and the social dimensions of climate impacts.*

## ***Past project examples:***

- *Tracking glacier & icefield declines in Montana*
- *Creating a Tribal Historic Preservation geodatabase, by digitizing early maps*
- *Monitoring bark beetles & forest health issues*
- *Tracking alpine treeline as an indicator of local climate change*
- *Camas & native food plant restoration*

***Selections made before March 15, 2017.***
